Anni di Esperienza: < 5

Ricerca Occupazione: Si

Disponibilità Stage: Si

Descrizione vetrina

My interest in graphic began since I was fifteen. I started using photoshop just for spending my waste time and for having some fun. As time went by the graphic ambient became my main passion. In 2010, when I graduated from high school, I enrolled at the Politechnic University in Turin, in the Faculty of Visual Communication. The next year I will graduate here and then I'll search for a specialist degree outside from Italy, and maybe for some jobs.
