Descrizione vetrina

Ho iniziato la mia attività professionale nel 1982 in uno studio nel centro storico di Verona in piazza Broilo al numero 3. Per 8 anni mi sono occupato di grafica, arredamento e design di oggetti. Ho realizzato prospettive per i progetti dei più noti Architetti Veronesi di allora. Nel dicembre del 1988 ho acquistato la mia prima postazione informatica costruita attorno al glorioso Apple Macintosh IIe. Grazie all'esperienza maturata su di essa sono diventato consulente nel settore della grafica computerizzata. Per molti anni mi sono dedicato interamente alla consulenza, vendita e assistenza di prodotti informatici. Oggi sento il bisogno di ritornare a fare il mio mestiere.
